MAKE SOME NATURE ART

Make a Leaf Wreath

**To make your wreath you will need a paper plate
+ some glue + some scissors +**

**You will need to collect around 20 colourful autumn leaves (that
you find fallen) + Ribbon as an optional extra**

Ask your grown up to help you cut out the centre of the paper plate
to create the base of your wreath

Before you start sticking your leaves onto the wreath have a play
about and see which leaves look nicest next to each other (tip - you
could experiment with different shapes and colours)

Make sure the leaves are dry and then use your glue to carefully stick
the leaves onto the wreath

If you have some ribbon , make a nice bow and use the glue to stick
it on to the wreath

**Tip. If you don't have a paper plate, you can try sticking the
leaves to a piece of ribbon or string, to make a leaf garland
instead.**

HALLOWEEN COLOURING

BUILD AN INDOOR DEN

Building a den outdoors can be a great adventure, but it can be lots of fun to build an indoor den and create a new space for play (especially on a rainy day).

To build your den you will need something sturdy to use as a base (chairs, table, sofa, a clothes airer), a sheet or blanket to make your roof and cushions/pillows to put inside.

Make a sturdy space, fill with cushions/pillows and cover with your blanket or sheet.

Once you've made your den you can use your imagination to transport your den to anywhere you like.

Tip. Make sure you have some help from a grown up.
